

## **Elections are over Politicians need to listen how to reduce Pollution and save MONEY! ECOFuelMax**

Pollution and Reducing Expenses has no Political Party. Why do Political Leaders refuse to Act in the Best Interest of the Public?

By: [ECO Fuel Systems, LLC](#)

**BOCA RATON, Fla. - Nov. 21, 2022 - PRLog** – We only hear talk of Electric vehicles to reduce Pollution. What about the 282+ million internal combustion vehicles on the road today? Why won't our leaders listen to a proven solution that they have successfully tested and have been using for over 10 years without any issues.

The US Border Patrol/Homeland Security, NASA, US Army and over 38,000 Yellow School Buses have successfully used the ECOFuelMax Pollution Solution, aka the ECO Fuel System. All have shown a decrease in operating expenses and Carbon Pollution 40% to over 70% on diesel and gasoline motors.

***SAVE MONEY By Reducing Pollution***

***Reduce Fuel Consumption***

***Reduce Maintenance***

***Reduce Downtime***

***Increase Sustainability***

***Guaranteed BBB A+ Rated 15+ Years***

***Low Cost Get a Warehouse Grant***

***(866) 374-0002***

Many are concerned who are elected leaders are working for? With full knowledge and firsthand experience government testing has documented a reduction of fuel consumption and an immediate reduction of 50%+ release of Carbon Pollution/Particulates and Greenhouse Gases. A standard Gasoline Passenger vehicle can save in excess of 10% in fuel consumption while increasing sustainability. A Diesel Truck or Bus can reduce Diesel Particulates & Pollution while reducing fuel consumption +/-8%.

The ECO Fuel System works through the scientific principle of electrolysis. Without any chemicals, electricity or maintenance it increases the Reid Vapor Pressure in fuel causing it to burn more combustible and cleaner. A cleaner burning fuel helps all motors run cleaner requiring less maintenance, with improved efficiency. A motor requires no modifications it only treats fuel, no warranty issues! The ECO is a Sole Source product, all ECO's have a No Risk Money Back Guaranty, BBB A+ Rated (15+ yrs).

Our leaders promised if we took the Covid-19 vaccine we wouldn't get Covid-19. Many who have been multi vaccinated with boosters have gotten the terrible Covid-19 infection, even the President of the United States. Vehicles around the world with the ECOFuelMax have been consistently reducing Pollution and saving money for 10+ years.

Electric cars and trucks may be the future. Unfortunately today they will not run in frigid temperatures, haul heavy loads or travel long distances. Allotting Trillions of Tax dollars for future electric vehicles without allotting one dollar to reduce Pollution today using a proven Guaranteed low cost solution may be counterproductive. Like the Environmentalists state time is running out! For a few hundred dollars a large truck can reduce Carbon Pollution +/-50% now, saving the user money.

The time to act is NOW. For more information about the Guaranteed low cost (\$400), No Risk Pollution and Fuel saving solution, call and speak with a human or go online (<https://ecofuelmax.com/>). GO GREEN – Burn Clean!
