

GLOBAL Warming - Pollution Control - Politicians place Blame Without Acting - ECOFuelMax

With recent Wildfires in Hawaii and Hurricanes in California Political Leaders blame Global Warming, but have ignored Proven Technologies to reduce Pollution & Greenhouse Gases +/-70% immediately.

By: [ECO Fuel Systems, LLC](https://www.ecofuelmax.com/)

MIAMI - Aug. 21, 2023 - *PRLog* -- For over 10 years, press releases as well as hundreds of Emails and telephone calls have been ignored. As a Citizen, I place blame on Government and Politicians, who are quick to place blame but fail to take action.

As a knowledgeable person I took action years ago to assist in reducing and Greenhouse Gases. At a trade show, I discovered the ECO Fuel System. A low cost option, to reduce Greenhouse Gases, utilizing Electrolysis/Electrostatic energy, it can last 20+ years. With hesitation I purchased a ECOFuelMax Pollution Solution to test, what did I have to lose?

Reduce Pollution Today

+/- 70%

Save +/-10% in Fuel!

No Chemicals

No Electricity

No Maintenance

No Risk - Guaranteed

Low in Cost

ROI +/-30 days

Much to my surprise it reduced fuel consumption (10%+) on both my diesel and gasoline motors. Certified Testing and a White Paper report done by a developer of the Catalytic Converter and Diesel Particulate Filter (R. Carlson) qualified my results. The reduction of Fuel Consumption was a result of increasing the Reid Vapor Pressure in fuel making it burn more combustible and cleaner (+/- 70%).

I closed my Company and became a Warehouse Distributor for the ECO Fuel System. That same ECO-2 filter has been on a Chrysler 300 V6 for +/-10 years. The vehicle has 191,000+ miles on it still saving +/-18% in fuel, no problems.

Political leaders have been communicated with and informed. Prior to President Biden's quest to go all electric Municipalities were successfully utilizing the ECO Fuel System. In my opinion, after Millions of dollars in Grants those who benefitted ceased utilizing the low cost guaranteed Pollution solution. The only State saving Millions today is Texas, with 200+ School Districts on 38,000+ School Buses, with multiple awards.

Unfortunately Electric has many drawbacks; 1. Power constraints; we do not have the infrastructure to support Electric Vehicles. Ask anyone in California where the power is out. 2. Cost and time to implement; the cost of an Electric vehicle is \$60,000+, the ECO only hundreds of dollars. How many years or decades will it take to implement Electric vehicles, can we afford to wait, Elon Musk says No!

The ECO Fuel System could reduce Fuel +/-10%, the ECO has been intentionally kept at a low price, no favors. How many leaders have benefitted from fuel or going Electric?

Why won't our Leaders take action to utilize a proven solution to reduce Carbon Pollution Immediately? In my opinion, if we wait the future looks grim, who then will the politicians blame?

For details and information Call, Email, Go Online (<https://ecofuelmax.com/>) or email to do a No Risk Test or place an order, BBB A+ Rated 20+ years.
