

Waste, Delivery Companies, and Long Haul Truckers all are saving Money – ECOFuelMax

Fuel and Maintenance prices rise again, what will the busy Summer Months cost? Diesel and Gasoline Fuel vehicle owners can all save money and reduce Carbon Pollution & Greenhouse Gases while reducing expenses.

By: [ECO Fuel Systems, LLC](#)

FT. LAUDERDALE, Fla. - April 18, 2024 - *PRL*og

-- You do not have to wait until 2030 or be forced to drive an Electric Vehicle. Today you can reduce Greenhouse Gases +/-70% on your current Fossil Fueled vehicle(s) using the ECOFuelMax Pollution Solution.

The ECO Fuel System, LLC fuel filter/enhancer enhances the combustibility of fuel causing it to burn cleaner and more efficiently. No Chemicals, No Maintenance or Electricity is required, it can last 20+ years. It works utilizing the principle of Electrolysis/Electrostatic energy. By Enhancing the Vapor Pressure in all fuels, causing it to burn more combustibly and cleaner. Diesel Owners

can reduce REGEN Cycles and DPF Maintenance by 70%+.

For Hundreds of dollars, not tens of thousands for an Electric Vehicle you can reduce Pollution and Fuel Consumption TODAY and not have mileage limitations. The ECO Fuel System is a Patented proven and Guaranteed product that is Low in Cost easy to install. A Long Haul Truck and a Municipal Transit or Traveling Bus can have an ROI of less than 20 days.

Due to fuel burning cleaner, Maintenance, Downtime and Fuel Consumption (+/-10%) is reduced and Sustainability is increased.

Horsepower and response is noticeably better. You can go online to

ECOFuelMax for reports or you can do at No Risk a Low Cost installation, on your vehicle(s) as a test.

If unhappy for any reason, return it undamaged for a full refund, BBB A+ rated 10+ years.
