WEST PALM BEACH, Fla. - April 10, 2024 -

PRLog -- Large Transport Companies and Waste Collectors from Florida to California have been installing the low cost ECOFUELMAX solution.

Until the price of Diesel Fuel hit \$4.00+ per gallon Trucking was unhappily paying the price. Saving Money is Crucial, +/-40 cents per gallon makes a difference. .

Over the last 10 years Tens of Thousands of Yellow School Buses, Transit Buses, and Trucking Companies have successfully used this Low Cost opportunity. Now Thousands around the World from Mongolia to Brazil have successfully tested and are using it on their Fleets (BBB A+ Rated).

Americans expect manufactures to install the ECO for them. That may never happen. Diesel Motor Manufactures and Petroleum Companies make too much profit on DPF filters and Fuel sales, our Government charges taxes.

The US Government uses it on their Gasoline and Diesel vehicles at the US Border Patrol, US Army, NASA and on School Buses. The US keeps it quiet, they want electric. Children should all breathe clean air. Now the Public and Companies are taking advantage of the Proven and Guaranteed Solution that has a short ROI.

The ECO works based on the Principle of Electrolysis/Electrostatic Energy. It causes fuel to burn more Combustible and Cleaner without the use of Chemicals. No Warranty Restrictions, it only treats Fuel and can last 20+ years, CARB APPROVED. Spending Hundreds not Tens of Thousands of dollars on an Electric Vehicle and reducing Carbon Pollution +/-70% is an smart alternative. Everyone benefits save fuel by reducing Pollution, pass the upcoming Clean Air Rule.

The ECO Fuel System is BBB A+ Rated for over 10 years, for more information Call or go Online (<https://ecofuelmax.com/>) for details, or to schedule a test on your vehicles. No Risk-Guaranteed.
