

Electric Vehicles Compromised by Nature – Lack of Electricity ECOFuelMax

Due electrical shortages and those caused by storms over the year's Electric vehicle owners and those who want to reduce Carbon Pollutants have been testing and installing the ECO Fuel System on their Gasoline and Diesel vehicles.

LOS ANGELES - Aug. 24, 2020 - [PRLog](#) -- California a leader in going GREEN has again been compromised by wildfires and the loss of electricity. Areas of Idaho have been without electricity for weeks Electric vehicles can't be charged. In the immediate future due to multiple Tropic Storms and Hurricanes the US Gulf Coast may be affected by the loss of electricity.

In 2019 after the wildfires in California many felt helpless not being able to charge their electric vehicles. Many Electric vehicle owners were frustrated and sold or traded in their Tesla's, Chevy Volt's and Jaguar I-Pace cars and went back to traditional vehicles.

In 2020 millions of acres of California are again burning in California. Pollution conscience consumers have been forced to seek alternative methods to reduce Hydrocarbons and Carbon Pollution. Over the recent few weeks the ECOFuelMax Pollution Solution has come to the forefront. The ECO Pollution Solution is a simple easy to install inline fuel filter/enhancer that works based on the process of electrolysis. Approved Government testing laboratory reports show a +/-70% reduction of Hydrocarbons on all fuels.

The ECO's proven and patented solution works utilizing the principals of electrolysis, causing fuel to burn more combustable and cleaner. It only treats fuel, no motor modifications, no warranty issues. Both Diesel and Gasoline owners have reported significant fuel savings. Diesel owners using the ECOFuelMax have experienced a reduction in REGEN Cycle's and DPF maintenance of 40% to over 70%.

Municipal Waste, Coach Buses, Heavy Equipment as well as over the road Trucking, Homeland Security, NASA and the US Army have been using this low cost system (\$395-\$495) for over 10 years. It is guaranteed to work, has a No Risk, Money Back Guarantee and can last 20+ years, BBB A+ Rating 10+ years.

Since 1999 the principals of ECO Fuel Systems have been helping Governmental agencies Municipalities, School Districts, Companies and the Public reduce maintenance expenses and fuel. To initiate a test or request more information call or go online <https://www.ecofuelmax.com>.
