*New Release!*

## Cobra Clean

*A Biodegradable, Non-Acidic, Non-Caustic  
Cleaning Solution*

**Clean your Diesel Particulate Filters, EGR  
Valves and EGR Coolers with ease!**

1. Remove your DPF
2. Place in large bucket
3. Completely submerge DPF in Cobra Clean solution
4. Let soak +/-24 hours
5. Remove from bucket
6. Rinse until clean with tap water or low power pressure washer
7. Dry, with air pressure and let sit in sun for a few hours
8. Reinstall

MSDS ([click here](#))

- In the event the DPF is extremely dirty or was previously cleaned with a pressure washer & soap it may be necessary to soak longer.
- When you see the Cobra Clean solution is Black, it is a good indication the Carbon has been released from the ceramic filter.
