

## **DIY Clean Diesel Particulate Filters, EGR Valves & Coolers without damaging heat – ECOFuelMax**

Clean your carbon damaged parts in house without damaging heat.

By: [ECO Fuel Systems, LLC](#)

**FORT LAUDERDALE, Fla. - June 23, 2020 - PRLog** -- Thousands of Transportation and Fleet Managers around the USA have learned about CobraCleanUSA. They use this simple Low Cost cleaning solution to keep DPF's, EGR Valves and Coolers clean and lasting longer.

The cost is 75% less that commercial cleaning that uses +/-1,800 degrees of heat. To clean a DPF the cost is \$85.00, an EGR \$5.00 and a Cooler \$20.00. There is no damaging heat so filters last longer. Cobra Clean is a Biodegradable Non Toxic, Non Acidic liquid cleaning solution that has been around for over 20 years, Many Municipalities and large Trucking Companies use it regularly.

***Save Thousands of Dollars Annually***

***Reduce maintenance DPF Expenses***

***Reduce Downtime***

***Clean your DPF's in-house without heat***

***Keep your diesel vehicles on the Road***

***Call***

***(866) 374-0002***

Fleet Managers can now clean their filters in house without damaging them. This simple process not only saves money but downtime and future maintenance expenses. Why send your filters out when you can clean them in house for less?

ECO Fuel Systems, LLC and its principals have been assisting in reducing Carbon Pollution and Maintenance since 1999. For information on how to reduce REGEN's or to clean your filters go online <https://ecofuelmax.com/cobra-clean> or call. GO GREEN-Burn Clean!
