

Reduce Diesel DPF Maintenance by Reducing Carbon Pollution – ECOFuelMax

Individuals and Companies are getting back on track. The Covid -19 scare finally has people realizing Carbon Pollution is an epidemic that can be treated. Are you aware that over Seven Million deaths annually are related to Carbon Pollution?

FORT LAUDERDALE, Fla. - Aug. 17, 2020 - [PRLog](#) -- Since the Coronavirus lockdown Municipalities, Companies and Individuals in the USA took a break and are again looking at future needs. Just yesterday phones started ringing like before established and new customers are calling and inquiring about the ECOFuelMax opportunity. What diesel owner doesn't want to cut back on Diesel Particulate Filter related maintenance and fuel use?

Municipalities with Coach Buses, Heavy Equipment and Trucking Companies have realized their essential vehicles with the ECO Pollution Solution remained on the road. Many without the ECO required maintenance. After suffering reduced staff, owners are realizing the benefits of reducing Pollution.

Europe and Asia over the last year have been increasing their efforts toward reducing Maintenance Expenses by reducing Carbon Pollution and Particulates. A Municipal Coach Bus with the ECOFuelMax has consistently shown the reduction of DPF maintenance, +/-70%. Heavy Equipment and over the road Trucks have experienced less downtime and fuel savings of 5%+.

The cost to protect a vehicle is a few hundred dollars; the ROI on a Coach Bus and Commercially used Truck is less than 20 days. The ECO System works by increasing the Vapor pressure and helps fuel burn more combustible and cleaner. It requires no Chemicals or Maintenance and can last 20+ years. It only treats fuel, no motor modifications, no warranty issues.

To prove it works on your vehicle(s) the ECOFuelMax System has a No Risk money back guarantee. Try it, if for any reason it does not meet your expectations return it for a full refund. ECO Fuel Systems can do this because it has proven to work on tens of thousands of motors; Diesel, Bio Diesel, Gasoline, CNG and Propane.

ECO Fuel Systems, LLC and its principals have been working for over 20 years helping consumers and the US Government reduce maintenance and Carbon Pollution. NASA, Homeland Security and the US Army have been using the ECO for over 10 years, its CARB approved. The author of this press release saves in excess of 10% on his gasoline V6 vehicle.
