

Reduce REGEN's Clean DPF's in house for 75% less – ECOFuelMax

Diesel Particulate Filters (DPF's) have always been a problem. For over 10 years we have been helping Diesel Owners reduce Maintenance costs by reducing Carbon Pollution/Particulates.

By: [ECO Fuel Systems, LLC](http://ecofuelmax.com)

WEST PALM BEACH, Fla. - Sept. 23, 2020 - PRLlog -- Fleets and private owners have the option to reduce the Particulates released by their Diesels by +/-70% using the ECOFuelMax Pollution Solution. Saving thousands of dollars annually per vehicle has been proven to work on tens of thousands of vehicles. Now you can do your part and earn money by reducing Pollution. No Risk, Money Back Guarantee.

Reduce DPF Maintenance

40% to over 70%

Reduce Carbon Pollution

For years Transit, Fleet and Privately owned diesel owners have been angry and complaining about the cost of cleaning and replacing DPF filters as well as the downtime of their vehicles that cause a loss of income. ECO Fuel Systems, LLC has been listening and helping those who ask.

Reduce Particulates

Reduce Downtime

(866) 374-0002

For a few hundred dollars any diesel owner can install an inline fuel filter/enhancer that is guaranteed to work or your money back. It only treats fuel, no motor modifications and no warranty issues. In addition to reducing Particulates we offer a Biodegradable, non acidic, non toxic cleaner that melts Carbon. Now diesel owners can clean their DPF's in house for \$85 or 75% less that heat cleaning them. Cobra Clean will not damage the ceramic filter of a DPF.

Those that heat clean their DPF's in a kiln at 1,800 degrees have learned that they need to replace them after a few cleanings. The cost to replace a DPF is \$2,300+-. Those that clean their DPF's with Cobra Clean have cleaned them as many as 8 times and still counting. Those that install the ECOFuelMax system have experienced +/-70% less REGEN's and DPF maintenance, a winning combination.

The ECO Fuel System principals since 1999 have been helping vehicles owners reduce Particulates, Maintenance Expenses and downtime. If you are interested in more information go on line <https://ecofuelmax.com/> or call and speak with ah human.
