

Save Fuel - Reducing Carbon Pollution ECOFuelMax

Diesel & Gasoline fuels have gone up in excess of \$1.00 per gallon in the last 7 months. When will it stop? The ECO Fuel System solution has proven itself for over 15 years to reduce Fuel costs, Maintenance and Downtime. Want to save Money?

By: [ECO Fuel Systems, LLC](#)

WEST PALM BEACH, Fla. - Aug. 5, 2021 - PRLog -- Many cities and the tens of thousands of ECO Fuel System users around the World have proven that it works, Some South Florida Municipalities have refused to reduce Pollution and save money even after testing it and seeing it worked. City Council elections are coming up, vote for representatives that are concerned and care for their residents, not just getting reelected. Recent statements and investigations have disclosed that select Municipalities once again may be under investigation for improper actions.

Reduce Maintenance

Increase Power

Save Money Now!

The ECO fuel System is a CARB approved fuel filter/enhancer. It will not affect any warranty's, it only treats fuel no motor modifications. Not to worry, if for any reason anyone is unhappy with the ECO Fuel System return it for a refund, BBB A+ Rated 12+ years. No one returns them because it works.

(866) 374-0002

Counties, Cities and Companies should be working for the benefit of their constituents' and customers. Pollution is a Pandemic that needs to be addressed today. The ECO will not only reduce Carbon Pollution/Particulates but will pay for itself in savings. ROI on a LTL truck is less than 10 days, on a Transit Bus less than 20 days.

Individuals who drive need to take action on their own. Our current government has stated that they want 50% of all new cars sold in the United States to be electric by 2030. Not all electric vehicle owners are happy, they feel limited and restricted. Many have gone back to conventional petroleum fueled vehicles.

Anyone interested in taking action today and saving on fuel costs should check on the ECO Fuel System. call or go online <https://ecofuelmax.com>. For over 20 years the principals at ECO Fuel Systems have been successfully working to reduce pollution and increase sustainability. GO GREEN – Burn Clean!
