TALLAHASSEE, Fla. - Feb. 13, 2023 - *PRL*og -- Why do our Leaders want to stop the use of all petroleum fuels and go electric? It has caused inflation to go through the roof. 61% of the United States power is created by Fossil fuels. How can electric vehicles be charged without Carbon or Petroleum based fuel? When will Commercial applications like cross country trucking and deliveries be ready to go electric?

Transit, Trucking, Municipalities, Businesses, and the Public unfortunately may have been misinformed. You do not have to buy an electric vehicle to reduce Pollution and save on Operating Expenses and Downtime. In fact creating a

take decades and that fossil fuels will be needed in the meantime."

There is a proven guaranteed CARB Approved solution. One that will for only a few hundred dollars pay for itself in short order, while reducing Greenhouse Gases IMMEDIATELY. The opportunity is the ECO Fuel System or ECOFuelMax Pollution Solution. It is a Patented and Guaranteed product (BBB A+) that works based on the principle of electrolysis, causing all fuels to burn more combustable and cleaner. No Chemicals or Maintenance is needed, it can last 20+ years, ROI +/-20 Days.

Gasoline motors that use the ECO Solution have experienced +/-15% in fuel savings. Diesel owners not only Save on Fuel (+/-8%) but have reduced REGEN Cycles and DEF as much as 73%, immediately. Reduced DPF Maintenance and DEF use can save owners thousands of dollars annually. It only treats Fuel, easy to install, No Motor Modifications, NO Warranty Issues!

All vehicle owners have an opportunity to act, inform your Legislature-Representative. For information go online (<https://ecofuelmax.com/>), call or email us. GO GREEN – Burn Clean and Save Money!
