

# The Best DIY DPF Cleaner - Keep Your DPF's Cleaner Longer – Save Fuel Guaranteed - ECOFuelMax

DPF's issues are a common problem. A Diesel Particulate Filter (DPF) is designed to trap soot, ash and other solid particles in a Diesel Motors Exhaust. Cobra Clean Biodegradable Non Toxic, Non Acidic cleaning solution is a proven opportunity..

By: [ECO Fuel Systems, LLC](#)

**MIAMI - Jan. 12, 2023 - PRLog** -- Additives or pressure washing may work temporarily on surface Carbon Deposits. Cobra Clean solution is a high quality product that cleans a DPF thoroughly by dissolving its carbon build-ups +/-99%. It is not a kit or additive; it is an easy soak, rinse, dry and install proven application used by many Cities, Government agencies, large Trucking companies and the Public.

[Cobra Clean](#) is easy to use: soak a DPF, DOC or EGR Filter for 24 hours, rinse, dry and reinstall. It works to restore DPF's to operate like new. It is safe to use on all DPF's. It is an ideal solution to help Diesel Owners pass emissions tests (smog).

Another proven and Guaranteed solution (10+ yrs) to help keep a DPF cleaner +/-70% of the time is the ECOFuelMax Pollution Solution or ECO Fuel System, LLC. It utilizes the scientific principle of Electrostatic Energy or Electrolysis. It increases the Reid Vapor Pressure in all fuels causing them to burn more combustible and cleaner. No Additives/Chemicals or Maintenance is required. Easy to install as a Fuel Filter, It only treats Fuel, No Warranty issues. You can lower Carbon Pollution/Particulates & Greenhouse Gas emissions 40% to over 70% for a cleaner more complete burn.

Fuel savings can be increased +/-10%. Example, a Transit Bus that runs stop and go 300+ miles per day has logged a fuel savings of 8.4% and a reduction of REGEN Cycles +/- 70%. The ECO has saved Municipalities \$4,000+/- annually in Maintenance, Downtime and Fuel savings. A Diesel Truck carrying a heavy payload can save 5%+ in Fuel as well as reduced DPF Maintenance and Downtime. A Gasoline vehicle has shown a +/-15% reduction in fuel consumption as well as increased power and longevity.

Owners can reduce Maintenance and Downtime by thousands of dollars annually, the ECO only costs a few hundred dollars and can last 20+ years, it has a No Risk Money Back Guarantee. The ROI on a Commercial Diesel Truck can be less than 20 days. Protect your investments by removing heavy existing Carbon Deposits while increasing engine performance by reducing Carbon Pollution/Particulates 40% to over 70%, Go online and see How it Works.
