

Climate Restitution; Shouldn't we be Helping USA's Citizens Reduce their Carbon Footprint and Save Fuel? - ECOFuelMax

Our leaders know how to reduce Carbon Pollutants, they have been using the ECOFuelMax Pollution Solution for over 10 years. The ECO opportunity could help Americans reduce +/-15% in Fuel costs (Gas & Diesel) while Reducing Carbon Pollution +/-70%?

FORT LAUDERDALE, Fla. - Dec. 13, 2022 - PRLog -- The ECOFuelMax Pollution Solution aka ECO Fuel System has for years been helping USA Government agencies like: US Border Patrol/Homeland Security, NASA, 200+ School Districts on 38,000 School Buses, Municipal Transit, Police, Fire, and Trucking, 10+ years. All have been reducing expenses and downtime by reducing Carbon Pollution/Particulates, [CARB Approved](#).

Leadership has given Millions of dollars in Grants to research the reduction of Carbon Particulates. For some reason in Florida Counties like Broward and Palm Beach have stopped utilizing the ECO Fuel System that reduced Diesel Regeneration Cycles +/-70% and fuel use by 8%+. For some reason influential parties want Municipalities to fail and go all Electric, ASAP, WHY?

866 374 0002

Tesla owner Elon Musk one of the world's richest people stated on August 29, 2022 "Civilization Will Crumble Without Oil and Gas In Short Term. The Billionaire suggested that the transition to green energy sources will take decades and that fossil fuels will be needed in the meantime."

Multiple Countries in Europe and Asia have taken notice and are installing the ECO Fuel System throughout their countries. The millions of US Grant dollars should be used here to reduce the existing Carbon Footprint in the United States. Was the \$148,000 one South Florida County was granted to study the reduction of Carbon Particulates wasted? They could have installed an additional 400+ ECO Fuel Systems on their vehicles reducing tons of Carbon Pollutants while saving Taxpayers millions of dollars.

If the Environmental Officers want to see what is being done overseas they should go to Malaysia, Mongolia or Malawi. They with multiple other Countries utilize the ECO Fuel System to reduce Pollution. A December 2022 test results showed a 14+% savings in fuel ([click here](#)).

Every Gallon of Diesel Fuel according to the EPA omits 22.38 pounds of CO2. How many millions of Tons of Carbon Pollution has our leaders in Florida allowed into the atmosphere? Charging stations for Electric vehicles are far from sufficient.

The private sector unfortunately may have been misinformed, you do not have to buy an electric vehicle to reduce Pollution. The cost of an Electric Car is \$45,000++; the ECO sells for a few hundred dollars, it will reduce Pollution immediately. Both Diesel and Gasoline vehicle owners have an opportunity to act on their own to reduce their expenses by using the [No Risk Guaranteed](#) ECO Fuel System.
