WEST PALM BEACH, Fla. - Oct. 18, 2023 -

*PRLog* -- The ECOFuelMax Pollution Solution (aka ECO Fuel System) has been helping tens of thousands of Diesel and Gasoline owners for over 10 years reduce Expenses by reducing Carbon Pollution/Particulates while increasing Sustainability. The ECO works under the scientific principle of Electrolysis-Electrostatic Energy, No Chemicals, No Maintenance, No Electricity. It increases the Reid Vapor Pressure in fuel causing it to burn more combustable and cleaner. Cleaner burning fuel increases MPG.

The ECO Fuel System not only reduces Fuel Consumption but Maintenance, Operating

Expenses and Downtime on Diesel Motors. Diesel Trucks and Transit Buses have documented +/- 70% less REGEN Cycles with 8+% increase in MPG.
